

ways to wasteless #15:

# Reveal what's in the trash.

Print out the graphics in this pdf and wheatpaste them to a dumpster or trashcan in your community. Each page of this document contains a piece of these info graphics. **You can chose which to print out and how to arrange them and put them up.**

Email photos and description of your wheatpasting to [hello@waystowasteless.com](mailto:hello@waystowasteless.com)

## How to make WHEAT PASTE:

INGREDIENTS: flour, water, sugar

1. Add cold water to 3 tablespoons of flour. Stir until it's a runny mix
2. Put one cup of water in your pot, heat it until it's almost boiling.
3. Put the cold wheat-water-mix in it slowly while stirring constantly with the beater/fork. (leave the pot on the hot plate while doing this).
4. Bring to boil (just for a minute or so).
5. Keep stirring!!
6. If you want, you can add a tablespoon of (white) sugar while it's still hot, for extra strength.
7. To adhere wheatpaste, apply it to both sides of the paper with a roller or sponge.
